

Jan Holmes

Jan is a highly experienced consultant in Quality Management and Process Improvement and is an SEI certified Lead Appraiser for the Development and Services models.

Jan has worked in Information Technology since 1971 and has held a variety of roles primarily in the areas of quality and risk assurance, quality management consultancy including project management and engineering methodology definition, process improvement and internal (computer) audit. In his most recent roles he has planned and led SCAMPI Class A, B and C appraisals for Fujitsu Services and BAE Systems as well as being an activist in Fujitsu Services' CMMI programme. He has taken part in or led 26 CMMI appraisals since 2004, including 10 SCAMPI As.

Previously he defined the engineering lifecycle to be used on a £30m applications and infrastructure project and successfully integrated this with Fujitsu's corporate process assets into a single coherent approach in use by the 150+ project team.

In addition to being a Lead Appraiser Jan is a qualified assessor of the European Foundation for Quality Management and has SC clearance from the Defence Vetting Agency.
