Peter Flower MBCS CITP

Peter is a specialist in effecting process change to deliver measurable expense reduction, increased productivity (reduced error rates and cycle times), improved schedule predictability and service delivery. He has been providing consultancy to blue chip clients in all commercial sectors for over 13 years and has a proven history of leading clients to levels two and three of the Capability Maturity Model (CMM) and CMM Integration (CMMI).

Peter is extremely customer oriented and as the founder and Managing Director of Trinity Management Consultants understands the commercial drivers of his clients businesses. With 30 years' experience in Information Technology he is able to combine a diverse range of skills in project and programme management, quality management, process change management and more to provide his clients with customer focused business solutions.

During his career he has performed many varying roles, from a Systems Engineer to IT Manager, across a variety of industry sectors. He has been involved in software quality initiatives since 1989, firstly with BS5750, then ISO9001 and since 1997 he has specialised in business improvement using the Software CMM and subsequently the CMMI. Peter is a certified IT professional and has been trained by the SEI in their Capability Maturity Models, CMM and CMMI, and is a PRINCE2 accredited Project Manager.

Under his guidance Trinity Management Consultants became an active member of the Professional Contractors Group (PCG) and was a founding member of the PCG Quality System. The PCG QS is a scheme for small consultancy businesses to cost effectively achieve full ISO9001:2008 compliance, independently audited by the most widely recognised certification body in the world (BVQi).
